

Monday, May 25 - M3B Concurrent Sessions Vendor Info Sessions

Check times by locations	Vendor Information Sessions
<p>OLD MAIN 3772 2:50PM - 3:10PM</p>	
<p>Designing a Campus-Wide WIL Journey: From Guided Exposure to Engaged, Career-Ready Experiences</p> <p>Presenter(s): Riipen</p> <p>Details: Preparing students for careers requires more than a single work-integrated learning experience at the end of a program. Research points to the value of scaffolding multiple touchpoints across a student's academic journey — from early, guided industry exposure through to engaged experiences where students are owning those interactions. This session explores a continuum spanning both curricular and co-curricular delivery models, with concrete examples of how institutions can structure these experiences at every stage. Presenters will also share how Riipen's infrastructure enables this kind of ecosystem approach at scale.</p>	
<p>OLD MAIN 3782 2:50PM - 3:10PM</p>	
<p>500 Employers Are Actively Watching Your Students' Work. Is Your Institution on the Map?</p> <p>Presenter(s): Anutio</p> <p>Details: What happens to the students who never land a co-op? Work-integrated learning remains one of the most valuable and least scalable parts of the student experience. Career services teams are being asked to support more students with fewer resources, while employers increasingly want clearer evidence of student skills and readiness. A new model is emerging. One where employers continuously discover student talent through verified mission outputs, skill portfolios, and real performance data; without relying solely on job postings or formal placements. This session explores how institutions are building always-on career development ecosystems using mission-based experiential learning, career mapping, and personalized upskilling tailored to the skillsets and job roles employers are actively iring for. This ecosystem helps every student build employer-visible evidence throughout their academic journey, not just during placements. Includes a live demonstration of career mapping, skill passports, employer-facing leaderboards, and mission-based learning in practice</p>	
<p>OLD MAIN 3782 3:20PM - 3:40PM</p>	
<p>Reimagining Employer Engagement: A Live Look at InPlace for Work-Integrated Learning</p> <p>Presenter(s): InPlace</p> <p>Details: Trusted by 500+ institutions across 14 countries and powering over 1 million student experiences each year, InPlace brings every part of your WIL process into one platform — co-op, clinical, field, and service learning. Join us for a 20-minute platform experience. See how InPlace helps you manage the complete WIL journey, with every student and every program in one connected record from pre-placement to post-graduation. Grow and retain employer relationships through a single directory where every contact, hiring history, agreement, and conversation lives. Employers of every size can also post opportunities via a simple email link, no logins required. Then see real-time, institution-wide reporting that delivers participation, outcomes, and compliance data in minutes. Do more, with less friction. Come see what's possible.</p>
